

## ABOUT POS

POS NEW 7210 is a best NFC/ contact chip/ mag stripe cards POS product of the New Technology Corporation, designed for the street and internal usage, equipped with a GPRS or WIFI connections possibility, that fits easy into your hand with a weight of 365 g, for the reasonable and competitive price.

## EASY FOR YOUR CASHIER

You can add paper just putting a roll of paper into the slot and closing the cover.

It has a very good battery capacity, that allows you to work, accepting payments of your customers without charging during all of the day.

## INTEGRATIONS

You can integrate it with your Point-Of-Sale Retail system, using our opened API and easy to customize terminal software, that supports all of the modern payment products from NFC cards till ApplePay, SamsungPay and QR based products. You can protect it more, using your own security solutions or security components stores with a SAMs.

## ■ MODERN LOOK WITH A LONG LIFE TIME

This POSs have been in operation with a non-stop service cycle during 3 years in the supermarkets and fair markets in the streets, servicing crowds of people.

Even when dropped and damaged the case, it continued to function perfectly.

Even a bad signal doesn't interfere with it. If there is a wifi network, you can always connect it to it.

## ■ COMFORTABLE TO HOLD

When your employees work all of the day, servicing a lot of your customers, it is very important to give the easy-to-use tool, that can become an inseparable whole for your salesperson.

Desire to use this equipment and respect for it will always extend its service life and save your business investment.

## ■ THE BEST TOOL FOR YOUR BUSINESS

If you have a banking branch, supermarket or fair street shop, - this POS will help you to accept any type of modern payments, using our SM3000 processing platform and POS software possibilities.

Leave us your wishes and we'll prepare for your business the best competitive solution on the market!

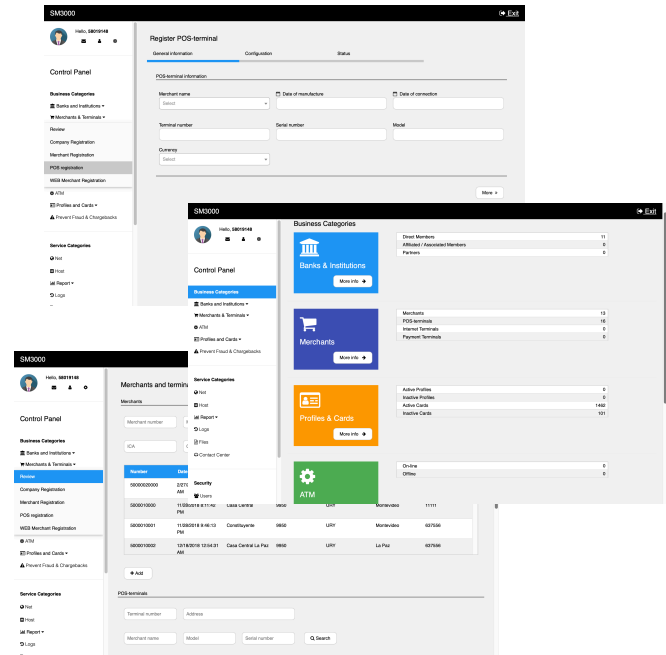

## POS NETWORKS PROCESSING

We process POS terminal networks since 1992, implementing first POS terminal in the country for the state bank of the Russian Federation

Our processing platform can help you manage all steps of the work with your POS, beginning from the software customization, terminal monitoring activity till the key management and fraud prevention tools.

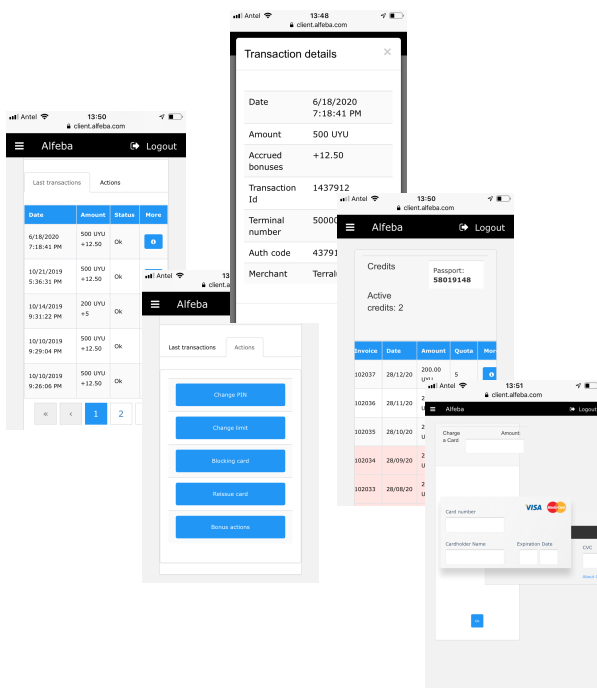

Do not hesitate to contact us and we'll present you our processing solutions for the POS networks and cards issuing and acquiring programs.

## CARD PRODUCTS FOR YOUR CUSTOMER

You know, that every customer is very important in the business, and to fix your customer using different loyalty programs is a modern task of your strategy.

To do it we developed miles&points and to buy-in-credit programs, that you can customize for your needs, presenting direct web-access to the card profile to your customer through the celular or the computer.

## ■ POS OPERATIONS

The POS terminal installed by the seller in the store allows the following actions with magnetic and chip cards, as well as with cards and NFC devices or scanning QR codes:

- sale by installments,
- card balance check,
- debit and credit sale without installments,
- balance charge (change of the card limit),
- payment for installments,
- cancellation of the sale,
- return,
- gift cards,
- miles&points operations,
- crypto currencies suport,
- reports and closing of the day,

The terminal monitor displays the logo and store data.
